# HDOC Day-73

## 1. Create an enumeration for days (SUNDAY to SATURDAY) and print each day with its integer value.

**Input:** No input

**C++ Program:**

```
#include <iostream>
using namespace std;

enum Days { SUNDAY, MONDAY, TUESDAY, WEDNESDAY,
            THURSDAY, FRIDAY, SATURDAY };

int main() {
    const char* names[] = {"SUNDAY", "MONDAY", "TUESDAY",
                           "WEDNESDAY", "THURSDAY", "FRIDAY",
                           "SATURDAY"};
    for (int i = SUNDAY; i <= SATURDAY; i++) {
        cout << names[i] << " = " << i << endl;
    }
    return 0;
}
```

**Output:**

```
SUNDAY = 0
MONDAY = 1
TUESDAY = 2
WEDNESDAY = 3
THURSDAY = 4
FRIDAY = 5
SATURDAY = 6
```

## 2. Define an enumeration for traffic lights (RED, YELLOW, GREEN) and print Stop, Wait, or Go based on its value.

**Input:** GREEN

**C++ Program:**

```
#include <iostream>
using namespace std;

enum TrafficLight { RED, YELLOW, GREEN };

int main() {
    TrafficLight light = GREEN;
    switch (light) {
        case RED: cout << "Stop"; break;
        case YELLOW: cout << "Wait"; break;
        case GREEN: cout << "Go"; break;
    }
    return 0;
```

```
}
```

**Output:**

```
Go
```
