HDOC Day 45 - Solved

Question 1: Change a date from dd/mm/yyyy to dd-Mmm-yy (example: 12/10/2026 to 12-Oct-26).

C Program:

```
#include <stdio.h>

void changeDate(int d, int m, int y) {
    char months[12][4] = {
        "Jan", "Feb", "Mar", "Apr", "May", "Jun",
        "Jul", "Aug", "Sep", "Oct", "Nov", "Dec"
    };
    if (m < 1 || m > 12 || d < 1 || d > 31) {
        printf("Invalid date\n");
        return;
    }
    printf("%02d-%s-%02d\n", d, months[m-1], y % 100);
}

int main() {
    int d, m, y;
    printf("Enter date (dd/mm/yyyy): ");
    if (scanf("%d/%d/%d", &d, &m, &y) != 3) {
        printf("Invalid input\n");
        return 1;
    }
    changeDate(d, m, y);
    return 0;
}
```

Sample Input and Output:

```
Enter date (dd/mm/yyyy): 12/10/2026
12-Oct-26
```

Question 2: Print all substrings of a string.

C Program:

```
#include <stdio.h>
#include <string.h>

void printSubstrings(char s[]) {
    int i, j, k, n = strlen(s);
    for (i = 0; i < n; i++) {
        for (j = i; j < n; j++) {
            for (k = i; k <= j; k++) {
                printf("%c", s[k]);
            }
            if (i != n - 1 || j != n - 1)
                printf(",");
        }
    }
    printf("\n");
}

int main() {
```

```
    char s[100];
    printf("Enter a string: ");
    scanf("%99s", s);
    printSubstrings(s);
    return 0;
}
```

Sample Input and Output:

```
Enter a string: abc
a,ab,abc,b,bc,c
```
